

Instructions: Use the equipment manual for each component to populate the frequency column with appropriate number of hours for each task. Maintain a separate set of records for both systems in a duplex PSA plant and all three systems in a triplex PSA plant. The technician who completes the maintenance task must put initials and dates in the appropriate columns. Customize this form to your PSA plant. Electronic copies of this form are available at: www.bhioxygen.org
Note: This document was developed by Build Health International for the Global Fund's Project BOXER.
